New Group Query Nodes:

A change has been made to groups to allow members to be future start dated and/or future end dated. In order to accommodate for this change, two new nodes have been added to the query tool, “Group Members (Custom)” and “Groups Belonging To (Custom)”. These will replace the old “Group Members” and “Groups Belonging To” nodes.

![Group Members (Custom) and Groups Belonging To (Custom) nodes](image)

You’ll also notice the “Is future” field, which will allow to query future group members:

![Is future field](image)

Your group queries will now look like this:

![Group Members (Custom) and Groups Belonging To (Custom) nodes](image)

All of the affected queries have been updated. Please use the new “Group Members (Custom)” or “Groups Belonging To (Custom)” nodes going forward. If you have any questions, please contact askit@uga.edu or Olivia Engesser (engesser@uga.edu).
